Education

Vellore Institute of Technology

B.Tech in Computer Science | CGPA: 7.11

2023 - 2027

Vellore, Tamil Nadu

St. Paul Jr. College

Class XII- MSBSHSE: 93.17%

2019 - 2021

Nagpur, Maharashtra

Technical Skills

Languages: Java, Python, JavaScript, C/C++, SQL

Frontend: React.js, HTML, CSS

Backend & DB: Node.js, Express.js, MongoDB, MySQL, REST APIs, JWT, OAuth, AWS (EC2, S3, Lambda, IAM, Bedrock)

Tools: Git, GitLab, Figma, VS Code, WordPress, Linux, Postman

Experience

CodeMyFYP

March 2026 - April 2026

Full Stack Developer Intern

Remote - [Certificate](#)

- Contributed to **Fasco**, a full-stack fashion e-commerce platform, building reusable UI components in **React.js**, **Tailwind CSS**, and **MUI** following Atomic Design principles (atoms, molecules, organisms).
- Implemented **JWT** and **OAuth** authentication flows and developed **RESTful APIs** with Node.js and Express.js backed by MongoDB.
- Followed **GitLab feature-branch workflow** - created scoped branches, raised merge requests, and maintained clean commit history for team code reviews.

Loyal String International

May 2025 - June 2025

Software Development Intern

Pune, Maharashtra - [Certificate](#)

- Engineered and customized **ERP modules** in React.js and SQL for real-time gold and RFID inventory tracking across multiple client sites.
- Integrated **RFID APIs** into live dashboards enabling real-time stock visibility; optimized SQL queries for backend data push and database maintenance.
- Delivered client-specific **APK deployments** and print configurations, directly resolving production issues through collaboration with cross-functional teams.
- Designed and refined **UI/UX** for order management, transaction, and stock dashboards ensuring real-time data sync and improved usability for end clients.

MDB Content Solutions

Dec 2025 - March 2026

Business Development Analyst Intern

Remote - [Certificate](#)

- Performed **tech-stack analysis and competitor research** for SaaS, ERP, and cloud service clients to support technical pre-sales and solution proposals.
- Managed **CRM pipelines and KPI dashboards**; applied **SEO, AEO, and GEO** strategies on WordPress pages to measurably improve search discoverability.

Projects

RAG Document Platform | Python, RAG, FastAPI, Chroma, Groq, Docker, CI/CD, Ollama

[Github](#)

- Built a full-stack Retrieval-Augmented Generation (RAG) system supporting **6 file formats** (PDF, DOCX, TXT, Markdown, PNG, JPG) with multimodal image captioning and semantic search
- Exposed **4 REST API** endpoints secured via **API-key authentication**, enabling programmatic access beyond the chat UI.
- Implemented **dual LLM inference** (Groq primary, Ollama local fallback) achieving **1.3s average end-to-end query latency**, averaged over multiple runs.
- Containerized with **Docker and Docker Compose**; validated via a **10 test automated suite** integrated into a **GitHub Actions CI/CD pipeline** with **100% pass rate**.

Mental Health Classification using LLM Fine-Tuning | Python, PyTorch, Hugging Face, Unsloth, scikit-learn

[Github](#)

- Built a **7-class NLP classification pipeline** on **52,681 labeled samples**, benchmarking TF-IDF + Logistic Regression/SVM against **QLoRA fine-tuned Gemma-3-1B**, improving accuracy from **77.99% (SVM baseline)** to **80.75%** and Macro F1 to **0.762** on a **10,537-sample held-out test set**.
- Identified and eliminated **data leakage (207 overlapping train/validation samples)** through duplicate detection, ensuring **zero train-validation overlap** before final evaluation.
- Designed a second controlled experiment applying moderate **class oversampling** to address **15:1 class imbalance**, evaluating minority-class recall and Macro F1 improvements against the original model.
- Implemented **parameter-efficient fine-tuning(QLoRA)** training only **4.96% of 1.05B model parameters**, using gradient accumulation and checkpointing to fit training within 14GB VRAM.

Certificates

Deloitte - Data Analytics Job Simulation (Forage)

Completed practical tasks in data analysis and forensic technology

[Certificate](#)

Python Programming with Tkinter & Database - Task CompuSys, Pune

Built GUI applications with Tkinter and SQL; implemented CRUD operations and form handling

[Grade: A+](#)
